# Ultraplex®

## 5-0-3+2% Fe & micros

ULTRAPLEX® is a sophisticated, proprietary, liquid combination of macro and micronutrients, plant and root promoting stimulators, a buffering agent, and plant and soil wetting agents. ULTRAPLEX® is a combination of the following Grigg Brothers® products. IRON COMBO CHELATE™ 40%, AMINOPLEX® 30%, and INTAKE™ 30%.

## Unique Qualities

- An effective non-ionic organic surfactant
- Enhances response of fertilizers and can improve efficiency of plant protectants and plant growth regulators
- Effective water buffering agent designed to resist large changes in spray tank pH
- Provides healthy color and combats stress

## Tru-Foliar™ Qualities

Our proprietary organic chelating and complexing technology makes the following benefits possible for all of our Tru-Foliar™ products:

- Compatibility
- Foliar absorption
- Highly efficient
- Easy to use
- No burn risk when used as directed
- Low risk of leaching
- Improved uptake & translocation
- Environmental soundness

### GUARANTEED ANALYSIS

Total Nitrogen(N).....5.0%
4.5% Urea Nitrogen
0.5% Nitrate Nitrogen
Potassium($K_2O$).....3.0%
Chelated Iron(Fe).....2.0%
Chelated Manganese(Mn).....0.4%
Chelated Zinc(Zn).....0.4%
Chelated Copper(Cu).....0.05%
Boron(B).....0.05%

Derived from: Urea, Potassuim, Boric Acid, Iron, Zinc, Manganese and Copper Glucoheptonates, Plant Based Amino Acids, Natural Saponins, Plant Extracts, Carbohydrates, Fruit Fiber, Protein and Enzyme Precursors.

## Application Guidelines

- For general Foliar application guidelines please refer to page 25.
- ULTRAPLEX® contains the non-ionic surfactant INTAKE™ no additional surfactant is necessary.
- TURF GRASSES: Cool or warm Season: Use 3-6 fl/oz per 1000 $ft^2$ of ULTRAPLEX® in combination with other Grigg Brothers® products.
- Use 6 fl/oz 1000 $ft^2$ rate when ULTRAPLEX® is applied weekly or bi-weekly as a stand alone product.
