

10-2-4

All Natural Organic

- Exceptional solubility in an All Natural Organic that is free of waste products, filler, sludge, manure or by-product residue. It has a great 5-1-2 ratio, is completely ground water safe, and with no unpleasant odors.
- Excellent spreading and dissolving characteristics. This product is dust-free and designed to penetrate the dense grasses in modern use. GreenSpec™ Protein Technology assures optimum nutrient release, to facilitate faster visual results from an all natural organic fertilizer.
- This formula does not have ash, cellulose, lignins, or fillers that can retard nutrient recycling. It is extremely low in salts and sodium.
- Contains at least 3.2% leonardite, a non-plant food ingredient derived from plant and animal fossils. This combines with available sulfur to improve poor soil conditions, buffer salts, and provide a carbon source to help neutralize toxins.
- Offers sustained, even feeding (10-12 weeks) that means more controlled growth with less frequent mowing and fewer grass clippings.
- Nutrient release and subsequent plant uptake determined by microbial activity and will vary based on soil moisture, temperature, pH, and turfgrass species.

GUARANTEED ANALYSIS

Total Nitrogen (N)10.0%
 1.10% water soluble organic nitrogen
 8.90% water insoluble organic nitrogen
 Available Phosphate (P₂O₅)2.0%
 Soluble Potash (K₂O)4.0%

Calcium (Ca)4.0%
 Sulfur (S)2.0%
 2.0% Combined Sulfur (S)

Derived from: blood meal, soy protein, feather meal, bone meal, sulfate of potash, kelp (*Ascophyllum nodosum*).

ALSO CONTAINS NON PLANT FOOD INGREDIENT:
 3.20% humic acid derived from leonardite

Water in thoroughly after application to help speed up breakdown.

Do not drag this product into aeration holes.
